A system of elements to combine and match, Turner offers a solution to different needs in terms of comfort and posture thanks to an easy mechanism which adjusts the depth of the seating, transforming the sofa from formal space into a real island of relaxation.

Turner is perfect for the client who likes to mix and match, thanks to its design logic, based on modularity which means that traditional sofas can be combined with chaises longues and day bed islands.

Available finishes

Fabric, leather.

Materials

Structure interior

Frame made of solid fir (Picea abies) and chipboard, with elastic straps.

Structure padding

High capacity variable density foam polyurethane. Light velvet cover.

Seat cushions

Insert in shaped polyurethane and sterilised feathers. 100% cotton cover.

Back cushions

Polyurethane flakes and sterilised down feathers in compartments. 100% cotton cover.

Frame

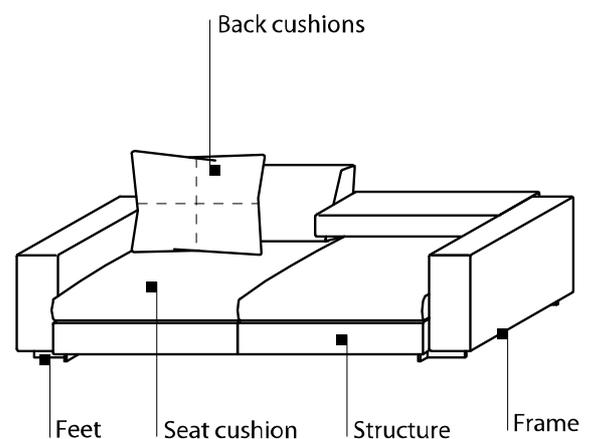

Painted metal with feet in non-slip plastic.

Feet

Extruded aluminium, anodised or painted.

Outer cover

Removable

Adjustable back positions

Use and maintenance

The product was designed for domestic use in domestic interiors; never jump up on structural parts. Avoid doing maintenance on components of products yourself, contacting your retailer with regard to any problem that may arise. Everyday use results in some compression of the padded parts during standard product life-span. The presence of any odours given off by the product, when unpacked, does not constitute a source of danger and disappear when it is exposed to an airy surroundings.

When the product must be moved, keep it up off the floor to avoid damage to parts that rest on the floor.

Maintenance - Covers

See covers information sheet (in the download section on the web site www.molteni.it).

Weekly padding maintenance

Fluff up cushions by hand, taking care to alternate the positions of the cushions used most often with the lesser used ones.

To fluff cushions up, shake all sides of the cushion (sides, tops and bottoms). This should be done after removing the cushions from the structure for improved air circulation.

Monthly padding maintenance

Remove cushion covers and fluff up as indicated above.

After doing this allow them to air, possibly outside, for about 30 minutes before replacing the covers.

Foot care

For ordinary care, use a soft, dry cloth to remove dust. For greasy dirt (fingerprints), we recommend the use of standard glass-cleaning detergents containing ammonia. Avoid products containing solvents and/or spirits and cloths with hard fibres (synthetic/linen) as they could ruin and/or scratch the surfaces.

For monthly maintenance of feet with shiny aluminium finish, treat surfaces using specific metal cleaning/polishing products.

Disposal

Once discarded, neither the product nor its components should be dispersed in the environment, but rather consigned to public disposal systems.
